

## Reception Curriculum Plan Autumn Term 2018

This overview is intended to give you a flavour of some of the things we will be learning in Reception this term.

### Communication and language

We support children to use their imagination to retell stories, they are encouraged to use story language to imagine and recreate roles and experiences in play. Every day we sing songs and simple rhymes. Every week, we learn a new word and its meaning and encourage children to use it in their play.

### Personal, Social and Emotional development

Children are encouraged to initiate interactions with other children. We support children in forming good relationships with adults and children. They learn how to work collaboratively as a team, negotiating and solving problems.

### Physical development

We spend a lot of time outdoors and love exploring the environment. We experiment with different ways of moving. For example, climbing on large stacks, tyres, tree stumps and rolling down grass mounds.

We work on strengthening the muscles in our hands by using small equipment, such as hole punches, tweezers and beads. We encourage children to put their coat, shoes and waterproof suit on independently and support them in using a knife and fork correctly at lunchtime.
