

# Reception Curriculum Plan

## Autumn Term 2018

This overview is intended to give you a flavour of some of the things we will be learning in Reception this term.

### Mathematics

Every morning we count how many children are in the class and find the amount of the number line. We explore the environment for shapes and patterns and play number games using a range of exciting, open ended resources. We encourage children to use mathematical language in their play.

### Literacy

We encourage families to choose a book everyday so they can read at home with their child. In class we share a range of books using puppets and props. Phonics is taught through Read Write Inc and we learn a new letter sound everyday. We are learning how to write the letter sounds and hear them in words. We use different types of media such as: pen and paper, chalk, water painting, whiteboards, finger painting and so much more when writing.

### Understanding the world

We are learning about ourselves and what makes us special and unique. We love to explore the environment and notice changes that occur in Autumn and Winter. We learn about celebrations such as; Guy Fawkes night, Christmas and Divali. We have a fantastic gardening area and will plant fruit and vegetables to harvest in Spring and Summer.

### Expressive Arts and Design

Children are given lots of opportunity to explore their creativity by designing and creating something new in the indoors and outdoors classroom. Children access musical instruments and will create songs and perform them to small groups.
