

West Earlham Infant and Nursery School  
Dental Survey – Spring 2022

We had 122 responses to the Survey

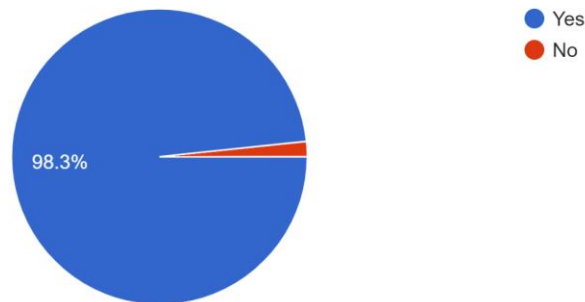

When you gave consent for your child's teeth to be screened by the dentist in school, why did you do this?

108 responses

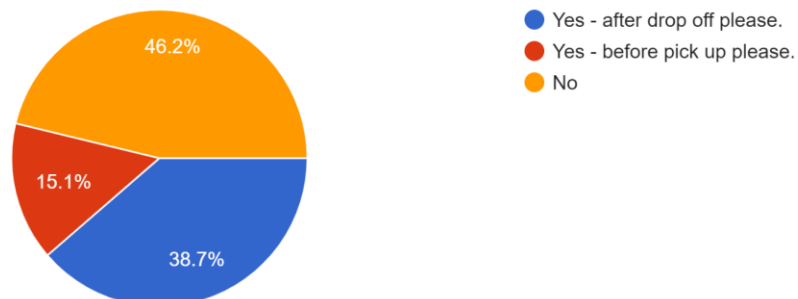

Are you happy your child is giving their teeth an extra brush in school each day?

120 responses

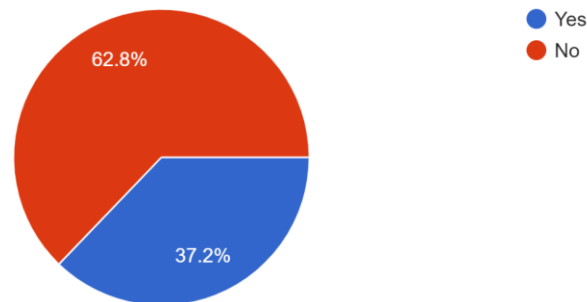

Would you be interested in coming into school for a short information session with the dentist, to find out more ways to protect your child's teeth/ask any questions you may have?

119 responses

Did you know that the heart, being the closest organ to the mouth, is affected by poor dental health?

121 responses

### Feedback:

What else would you like to say about what we are doing to support your child having healthy teeth? Is there anything else you think we can do to help? We really appreciate your feedback.

I personally think it's good to show the children about teeth health. Since she has done the blue tablet and seen the dentist she is much more willing to clean her teeth twice at home and not just a little brush, we do 2 mins with a timer. Also really reassuring as so hard to get a dentist thanks to them coming into school I now both have them in a dentist as the last one just took them of their books. I'm sure you already do but explaining that sweets are particularly bad for teeth as she is a sweet monster lol.

I'm very happy school is getting involved to promote kids dental health. I'd love if my child would be encouraged to brush her teeth at school. It's great idea. Would be appreciated if teaching staff time to time remind pupils how great and fun it is to brush their teeth at home and school so kids feels it is a great routine as my girl brushes at home only if mum tells her to do so but not brushing if not told

Thank u for making my child aware of the importance of brushing her teeth
